1) A weather app updates temperatures every minutes. Which facet of data is involved?

Ans:-

The facet of data involved is velocity. It refers to the speed at which data is generated, collected, and updated. Here, temperature data is continuously updated every minute.

---

2) A university stores student detail in rows and columns what type of data structure is this.

Ans:-

This is structured Data. It is organised in a fixed format using rows and columns.

---

3) Customer comments on social media are collected for analysis. What type of data is this?

Ans:-

This is Unstructured data. Social media comments are usually text-based and do not follow a fixed table struct.

---

4) A company collects a very large amount of daily user activity data from its mobile app. Which B.D characteristic is applied?

Ans:-

The Big Data characteristic is Volume. mobile app activities can produce large amount of user data everyday

---

5) A hospital dataset contains missing age values and incorrect phone numbers. Which data quality issue is present?

Ans:-

The data quality issues are mailing and missing values and inaccurate data. These are two quality issues affect data analysis.

---

6) A business wants to convert customer data into useful sales decision? Which Big Data characteristics is important?

Ans:-

Value is the Big Data. Value means extracting useful information from data to support business decision.

---

17) A company stores large files in HDFS. Which part of Big Data ecosystem is used?

Ans:-
The component used is HDFS. It is used to store very large datasets across multiple computers.

18) A company wants to process large datasets using parallel computation. Which B.D tool can used?

Ans:-
Apache Spark can be used for this purpose. It is useful for fast analysis of Big Data.

19) An organisation wants to collect live sensors data from IoT devices. Which B.D.E Components is suitable?

Ans:-
Apache Kafka is suitable for collecting live sensor data. It can efficiently transfer IoT data for further processing.

20) A company wants to visualize B.D results for decision makers, which tool or method can be applied?

Ans:-
Tableau or Power BI can be used to visualize B.D results. They present data using charts, graphs and dashboards.
